

Lactana®

ORGANIC Follow-on Milk 2

after the 6th month

+ Bifido cultures + DHA* + ALA**

DE-ÖKO-001
EU-/Non-EU-
agriculture

PROPERTIES

- * contains **DHA** (Docosahexaenoic acid, according to law), corresponding to a normal development of the sight of babies. The positive effect occurs with a daily ingestion of 100 mg DHA. DHA is an omega-3 fatty acid.
- ** with natural **alpha-linolenic acid** (omega-3, according to law), contributing to normal brain and nerve tissue development
- ✓ contains **Vitamin A** for the immune system and **iron** for the cognitive development (according to law)
- ✓ contains valuable **Bifido cultures**
- ✓ is suitable after the 6th month following breastfeeding or if your baby is not satiated with **Töpfer Organic Infant Milk 1** anymore
- ✓ is adapted for the increased hunger and the special nutritional needs of your baby
- ✓ fulfils the highest demands on quality and complies with the latest state of nutritional science
- ✓ corresponds to the standard of the EU organic regulation: high-quality raw materials from controlled organic cultivation are used

¹ organic milk from the Allgäu

² organic palm oil from sustainable cultivation

* from organic production

IMPORTANT INFORMATION

Sole breast feeding in the first 6 months is ideal for your baby. **Töpfer Organic Follow-On Milk 2** should not be used in the first 6 months as a substitute for breast milk, but only for infants older than 6 months as part of a mixed diet. The individual growing and development needs of your baby, however, can require it necessary to include Follow-on milk as part of a mixed diet into your baby's diet at an earlier time. Please ask your paediatrician's advice. Ensure a balanced diet and a healthy way of living.

HOW SUPPLIED

Powder: package with 600g (2 airtight inner bags à 300g), packed under protective atmosphere

Strong support for tender times.
