INSTRUCTIUNI DE INTRETINERE

PENTRU CHIUVELE DIN GRANIT

Dragi clienti,

Va multumim pentru ca ati achizitionat produsul nostru. Pentru cea mai inalta calitate a produselor si serviciilor noastre, va recomandam sa respectati recomandarile noastre privind utilizarea chiuvetei de granit achizitionate.

RETINETI FAPTUL CA ACEASTA CHIUVELE ARE 10 ANI GARANTIE

Modul de utilizare:

Chiuveta indeplineste cerintele functionale in conformitate cu EN-13310

1. Nu recomandam asezarea directa a oalelor, tigailor si a altor obiecte fierbinti pe suprafata chiuvetei (retineti ca partea inferioara a tigaii poate fi incalzita pana la 500°C) – pot fi provocate daune grave pe suprafata chiuvetei.
2. Obiectele fierbinti trebuie asezate pe o tava din lemn sau plastic, conceputa special pentru aceste tipuri de produse.
3. Nu folositi niciodata suprafata chiuvetei ca suport pentru taierea legumelor sau a altor produse alimentare.
4. Atunci cand curatati chiuveta, nu utilizati inalbitori sau agenti de curatare care contin inalbitori sau substante abrazive. Nu folositi perie de sarma sau burete de sarma – acestea pot crea zgarieturi, pete sau alte deteriorari pe suprafata chiuvetei.
5. Nu aruncati obiecte grele in chiuveta, pot fi provocate daune majore.

Atentie! Curatarea produsului cu lichide speciale pentru desfundarea tevilor, cu tablete de curatare sau cu alti agenti chimici poate provoca daune iremediabile produsului.

Modul de curatare:

1. Curatati produsul dupa fiecare utilizare. Pentru curatarea chiuvetei, folositi apa calda, lichid de spalat vase si o carpa moale.
2. Va rugam sa tineti cont de faptul ca pe parcursul curatarii zilnice a produsului, pe suprafata chiuvetei (in special pe partea inferioara a chiuvetei) pot aparea depuneri de calcar. Pentru a indeparta depozitele de calcar, va recomandam sa efectuati o curatare speciala a chiuvetei (de 2 ori pe saptamana) folosind un lichid special. Dupa curatare, clatiti cu multa apa si stergeti pentru uscare. Daca este necesar, repetati actiunea de mai sus.
3. In cazul in care depozitele de calcar sunt vizibile, va recomandam sa verificati sursa de alimentare cu apa si compozitia apei. Nivelul de duritate a apei trebuie sa fie conform normelor tarii dvs.
4. Atentie! Pentru a pastra chiuveta intr-o stare buna si pentru a o proteja impotriva murdariei, va sfatuim sa lubrifiati produsul cu ulei comestibil cel putin o data pe saptamana.
5. Pentru curatare va sfatuim sa folositi pasta si lichid special pentru chiuvete de granit.
